Sistem P Push-In Fittings

Designed for quick coupling and release of tube, Sistem P push in fittings are manufactured using the latest technology and are compatible with a variety of tube including nylon.

Utilising lightweight, high-strength materials, the fittings are nickel-plated to protect against corrosion, making them particularly suitable for food and chemical applications.

Special oil-resistant, nitrile O-ring seals are used for prolonged life and create a bubble-tight seal which is particularly suitable for low-pressure circuits. Once the tube is inserted into the fitting it is automatically sealed and locked into position with a unique security grip.

Pneumatic Hand Valves

To insert the tube into the fitting, insert it fully to the end, and to release, shut off the compressed air and push the sleeve to pull the tube out.

Be sure to select the product according to your needs as hand valves vent the downstream line using a 3-way method so that leakage may occur when fluids other than air are applied.
