

Antifriction
COMPONENTS

The UK's Only Authorised Distributor of Nilos Rings

NILOS ring is the ideal solution for your sealing problem:

- Sturdy, low-wear metal seal for extreme application conditions.
- Can be used in virtually any existing structure due to its low overall height.
- Considerable increase in service life, even in case of high-grade bearings with already integrated sealing.
- LST-L: Considerable sealing effect against liquids.

***Keep dirt, dust, debris and other abrasive
contaminants out of ball and roller bearings***

NILOS-Rings can accommodate a range of single and double-row bearing types, including:

- Self-aligning ball bearings & roller bearings
- Deep groove ball bearings
- Angular contact ball bearings
- Cylindrical roller bearings
- Spherical roller bearings
- Taper roller bearings
