Ingenuity in PERFORMANCE

Ingenuity in SERVICE

Reliable performance when you need it

For bespoke solutions on short lead-times or for performance which falls outside of normal stock range envelopes, Revolve has both the technical expertise, design and production capacity to deliver engineering solutions on a range of slewing rings from 300mm to 4500mm external diameter.

Specialising in low volume, custom manufacture, Revolve relies on the skill and experience of our teams to work with customers, developing optimised solutions which will fit your application and schedules.

Applications
Revolve offers slewing bearings for many applications such as;

- Cranes
- Medical
- Water Treatment
- Offshore
- Mining
- Defence
- Transport
- Forestry
- Packaging
- Wind Turbines
- Solar Panels

The Revolve Service

We can provide you with a solution regardless of whether you require a bespoke design or small adaptations to standard product. At Revolve we are equipped with state-of-the-art technology which provides us with the ultimate in production flexibility, ensuring lead times are kept to a minimum

- Single row ball bearing
- Double row ball bearing
- Cross roller bearing
- Three row roller bearing
- Roller/ball bearing

The gear teeth, if required, can be internal or external with both helical and straight forms available.

Bespoke Solutions
Our production techniques combined with the technical excellence of our engineers mean we are able to design and manufacture slewing rings to customer's exact technical specifications or to suit the requirements of their specific application.

In-house Repair and Refurbishment
Revolve are also able to repair and refurbish slewing rings - dependant on size and cost. For more information contact Revolve technical department direct.

Manufactured to Exacting Standards
All Revolve Slewing Rings are European manufactured to the highest quality standards from European sourced high quality raw materials.
